## Summary

Final-year Computer Engineering student (9.45 CGPA, graduating 2027) and competitive programmer (LeetCode Knight, 1950 max rating; 700+ DSA problems solved) with experience building full-stack applications using Java, Spring Boot, React.js, and AI/ML technologies. Seeking an SDE role to apply strong DSA and software engineering skills.

## Education

**Pune Institute of Computer Technology (PICT), Pune** 2023–2027
Bachelor of Engineering – Computer Engineering CGPA: 9.45

## Experience

**Developer & Researcher – AI/ML Resume Parser** Jan 2026 – Apr 2026
*In-House Internship, PICT*

- Developed an AI-based resume parser using NLP and transformer models to extract skills, education, and experience.
- Implemented semantic resume-job matching using Sentence-BERT embeddings and cosine similarity.
- Built a React-based interface for resume upload, candidate profiling, and displaying extracted information.

## Technical Skills

**Programming Languages:** Java, C++, Python, JavaScript, SQL
**Backend Development:** Spring Boot, Spring MVC, Spring Security, Spring AI, Microservices, RESTful APIs, JWT Authentication, OAuth2, JPA, Hibernate, Maven
**Frontend Development:** React.js, HTML5, CSS3, JavaScript
**Databases:** MySQL, PostgreSQL, MongoDB
**Cloud & DevOps:** Docker, AWS, Google Cloud
**Tools:** Git, GitHub, IntelliJ IDEA, VS Code, Postman
**Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

## Technical Projects

**Canteen Management System** [GitHub] 2026

- Built a full-stack cafeteria management platform with role-based access for Admin, Manager, and Coordinator using React.js and Spring Boot.
- Implemented secure authentication with Spring Security, JWT access/refresh tokens, and HTTP-only cookies.
- Designed RESTful APIs for order management, user management, QR-based voucher validation, and payment workflows.
- Designed a normalized MySQL schema using JPA/Hibernate to maintain transactional consistency under concurrent access.
- Automated food coupon validation through QR-code scanning, eliminating manual verification at the counter.

**PageForge – AI-Powered PDF Toolkit** [GitHub] 2026

- Built a full-stack PDF manipulation and AI document platform using Spring Boot 3.3, Java 21, React 19, and MySQL.
- Integrated Google Gemini API for conversational RAG-based document chat and automated summarization.
- Implemented PDF processing pipelines for merging, splitting, reordering, encryption, and Word/PDF conversion using Apache PDFBox and Apache POI.
- Implemented JWT authentication, operation-history logging in MySQL, and AWS S3-based file storage.
- Containerized the backend with Docker and deployed automated CI/CD to AWS EC2 using GitHub Actions and Nginx.

## Achievements & Coding Profiles

- Solved **700+** Data Structures and Algorithms problems across LeetCode and CodeChef.
- **LeetCode (Knight):** Maximum rating of **1950**. [Profile]
- **CodeChef (3-Star):** Maximum rating of **1650**. [Profile]

## Hackathons & Leadership

- **Smart India Hackathon (SIH) 2025:** Designed "Aluminate," a centralized alumni management platform to improve engagement and communication between institutions and alumni.
- **Event Coordinator, PICT INC (2025):** Coordinated campus-wide technical events, managing logistics and collaborating across multiple student teams.
